CITY OF MIAMI BEACH, FLORIDA
NOTES TO REQUIRED SUPPLEMENTARY INFORMATION
SEPTEMBER 30, 2005
(Unaudited)

1. Budgetary Policy

A. Budgetary Data

The City is required to prepare, approve, adopt and execute an annual budget for such funds as may be required by law or by sound financial practices and generally accepted accounting principles.

The City's governmental funds have legally adopted annual budgets for the General Fund, Resort Tax Fund, Miami Beach Redevelopment Agency Fund, General Obligation Debt Service Fund and Miami Beach Redevelopment Agency Special Obligation Debt Service Fund.

Budget to actual comparisons for the General Fund, Resort Tax Fund and Miami Beach Redevelopment Agency Fund are presented in the Required Supplementary Information section of this report. Budget to actual comparisons for the General Obligation Debt Service Fund and Miami Beach Redevelopment Agency Special Obligation Debt Service Fund are presented in the Supplementary Information section of this report.

At least 65 days prior to the beginning of the fiscal year, the City Commission is presented with a proposed budget. The proposed budget includes anticipated expenditures and the means of financing them. After Commission review and public hearings, the budget is adopted prior to October 1st. The budgets are approved by fund and department, and controlled at the department level. Management may transfer amounts between line items within a department as long as the transfer does not result in an increase in the department's budget. Increases to funds or department budgets and transfers between departments require City Commission approval.

There were three (3) supplemental budgetary appropriations during fiscal year ended September 30, 2005.

Budgets are considered a management control and planning tool and as such are incorporated into the accounting system of the City. Budgets are adopted on the modified accrual basis of accounting with the inclusion of encumbrances as reductions in the budgetary amount available (Budgetary Basis). Appropriations not encumbered lapse at yearend.

Encumbrance accounting, under which purchase order commitments for the expenditures of monies are recorded in order to reserve that portion of the applicable appropriation, is employed as an extension of formal budgetary integration in the governmental funds. Encumbrances outstanding at year-end are reported as reservations of fund balances, since they do not constitute expenditures or liabilities because the commitments will be reappropriated and honored during the subsequent year.

See accompanying independent auditors' report
